Notice to Investors

Forward-looking Statements: Certain statements in this presentation contain "forward-looking statements" within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended, including, without limitation, expectations, beliefs, plans, and objectives regarding anticipated financial and operating results, cost reductions, rig counts, pending asset acquisitions (including the anticipated closing thereof and benefits therefrom), asset divestitures, exploration activities, estimated reserves, drilling locations and timing, global oil and gas demand and production, capital expenditures, capital returns, debt repayments (including debt reduction targets and associated timelines), price estimates, tax and interest savings, exploration and development programs, first oil and future drilling in Suriname and other locations, gas trading, typical well results and well profiles, type curve, and production and operating expense guidance included in this presentation. Any matters that are not historical facts are forward looking and, accordingly, involve estimates, assumptions, risks, and uncertainties, including, without limitation, risks, uncertainties, and other factors discussed in our most recently filed Annual Report on Form 10-K, recently filed Quarterly Reports on Form 10-Q, recently filed Current Reports on Form 8-K available on our website, www.apacorp.com, and in our other public filings and press releases. These forward-looking statements are based on APA Corporation's (APA) current expectations, estimates, and projections about the company, its industry, management's beliefs, and certain assumptions made by management. No assurance can be given that such expectations, estimates, or projections will prove to have been correct. A number of factors could cause actual results to differ materially from the projections, anticipated results, or other expectations expressed in this presentation, including the company's ability to meet its production targets, successfully manage its capital expenditures, complete, test, and produce the wells and prospects identified in this presentation, successfully plan, secure necessary government approvals for, finance, build, operate, and maintain the necessary infrastructure, achieve its production and budget expectations on its projects, and achieve its cost reduction goals, including for both run-rate and realized savings, and debt reduction goals. Such factors also include commodity price volatility, regulatory and tax changes, trade policies, sanctions, and geopolitical risks.

Whenever possible, these “forward-looking statements” are identified by words such as “anticipates,” “intends,” “plans,” “seeks,” “believes,” “continues,” “could,” “estimates,” “expects,” “goals,” “guidance,” “may,” “might,” “outlook,” “possible,” “potential,” “projects,” “prospects,” “target,” “should,” “upside,” “would,” “will,” and similar phrases, but the absence of these words does not mean that a statement is not forward-looking. Because such statements involve risks and uncertainties, the company's actual results and performance may differ materially from the results expressed or implied by such forward-looking statements. Given these risks and uncertainties, you are cautioned not to place undue reliance on such forward-looking statements, which speak only as of the date hereof. Unless legally required, we assume no duty to update these statements as of any future date. However, you should review carefully reports and documents that the company files periodically with the Securities and Exchange Commission (SEC).

Cautionary Note to Investors: The SEC permits oil and gas companies, in their filings with the SEC, to disclose only proved, probable, and possible reserves that meet the SEC's definitions for such terms. We may use certain terms in this presentation, such as “resource,” “resource potential,” “net resource potential,” “potential resource,” “resource base,” “identified resources,” “potential net recoverable,” “potential reserves,” “unbooked resources,” “economic resources,” “net resources,” “undeveloped resource,” “net risked resources,” “inventory,” “upside,” and other similar terms that the SEC guidelines strictly prohibit us from including in filings with the SEC. Such terms do not take into account the certainty of resource recovery, which is contingent on exploration success, technical improvements in drilling access, commerciality, and other factors, and are therefore not indicative of expected future resource recovery and should not be relied upon. Investors are urged to consider carefully the disclosure in APA's most recently filed Annual Report on Form 10-K, available at www.apacorp.com or by writing to: 2000 W. Sam Houston Pkwy. S., Suite 200, Houston, Texas 77042 (Attn: Corporate Secretary). You can also obtain this report from the SEC by calling 1-800-SEC-0330 or from the SEC's website at www.sec.gov.

Non-GAAP Measures: Certain information may be provided in this presentation that includes financial measurements that are not required by, or presented in accordance with, generally accepted accounting principles (GAAP). These non-GAAP measures should not be considered as alternatives to GAAP measures, such as net income, total debt or net cash provided by operating activities, and may be calculated differently from, and therefore may not be comparable to, similarly titled measures used at other companies. For a reconciliation to the most directly comparable GAAP financial measures, please refer to APA's second-quarter 2026 earnings release at www.apacorp.com.

Unaudited Information: None of the information contained in this document has been audited by any independent auditor. This presentation is prepared as a convenience for securities analysts and investors and may be useful as a reference tool. We may elect to modify the format or discontinue publication at any time, without notice to securities analysts or investors.

About APA Corporation: APA owns consolidated subsidiaries that explore for and produce oil and natural gas in the United States, Egypt, and the United Kingdom and that explore for oil and natural gas offshore Suriname and elsewhere. APA posts announcements, operational updates, investor information and press releases on its website, www.apacorp.com.

About APA

Established in 1954, we contribute to global progress by helping meet the world's energy needs

429 Mboe/d*

Reported Production

~$2.1 Billion*

2026 Upstream Capital Investment

5 Exploration/Appraisal Wells*

Planned for 2027

~900 Million*

2020-2026E Exploration Capital

Oil exploration plays
Oil/Gas exploration plays

Note: Reported production and capital estimates reflect latest full year guidance; $900MM includes Suriname appraisal capital and excludes Egypt and Permian. Exploration/Appraisal wells exclude Egypt and Permian wells

APA's Differentiated Investment Case

Durable, High-Quality Core Portfolio

Stable, Predictable FCF Foundation in Permian and Egypt

Capital Efficient Asset Base

Attractive Reinvestment Rates in Permian and Egypt

Structural Cost Leadership

~$675MM YE26 Run-Rate Cost & Interest Savings vs. 2024 exit

APA Corporation

Visible Organic Oil Growth

>5% 3-Year Oil CAGR

Significant Exploration Upside

Catalysts in Suriname, Alaska, and Uruguay

Strong Capital Returns Framework

Approaching Net Debt Target of $3Bn

≥60% Annual FCF Equity Return

Forward-looking and non-GAAP measures are subject to the definitions, assumptions and reconciliations in the APA earnings supplement

2Q Highlights: Strong Execution Supporting Higher FCF

Recent Highlights

Outstanding Execution on Core Assets

- Delivered 2Q26 U.S. oil production **2.5 Mbbl/d** above guidance
- **Raised FY26 U.S. oil** outlook with capital unchanged
- Increased cost savings across the portfolio from **$450MM** to **$500MM** run-rate

Strategic Progress

- **Significant debt reduction** strengthens financial flexibility
- Nearly **50%** of Egypt gas receiving new higher price
- **Alaska acquisition**(2) will support exploration, appraisal, and potential development
- **Announced Eni partnership** on OFF-6; exploration well to spud in 2027

$500MM	$752MM	$1.2Bn (1)	123 Mbbl/d
Increased Run-Rate Cost Savings	1H26 Debt Repaid	1H26 Free Cash Flow	FY26 U.S. Oil Guidance Raised

(1) For a reconciliation to the most directly comparable GAAP financial measure, please refer to the Non-GAAP reconciliations; please refer to the glossary of referenced terms for the definition of free cash flow
(2) Transaction is expected to close by year-end 2026, subject to regulatory approval and customary closing conditions.

The Case for Exploration

Renewed Focus on Exploration as Durable Demand Meets a Maturing Supply Base

Exploration spend	Industry proved reserve life	Projected global oil production decline with no Exploration	Revised IEA 2030 oil demand forecast
-60%	**-25%**	**-4% per year**	**105.5 mb/d**
vs. 2013 peak	vs. 2013 peak		+33.5 mb/d vs. 2021 NZE

What has changed

- **Reserve replacement** — Looking beyond Shale
- **Energy security** — Durable, lower-risk supply matters again

What has not changed

- **Demand Growth** — Demand projections continue to be revised higher
- **APA's Strategy** — Capital efficient base business supporting Exploration
